### 2. Overall Recommendation (tick one of the following levels):

Accept without any changes	
Accept with minor revisions	
Consider after major revisions	
Revise and resubmit	
Reject the paper	

#### **3.** Comments and Suggestions to the Author(s):

#### Please provide an overall evaluation of the manuscript briefly (100-200 words):

For the manuscripts that cannot be published, please specify the inadequacies.

This text is very useful for policy makers regarding determining working hours, providing an understanding that during the pandemic technology has not been able to increase accountants' productivity but productivity is more determined by individual technical abilities in increasing productivity. For the future, technological developments will be more rapid and progress will not be stopped, so companies must work on how technology can play a role in accountant productivity. This paper presents adequate theory and is supported by the use of appropriate methods. The discussion of the manuscript has presented the reasons why the two variables do not have a significant effect, as well as presenting the limitations of the written manuscript. So overall this manuscript is suitable for publication.

Please provide reasons for acceptance or rejection as well as any suggestions that you might feel are appropriate for revisions or improvements.

Perspectives: title, abstract, literature review, research methods, figures, tables, language efficiency, structural logic, innovation points, etc.
